The Line

Six surfaces, each specified for one job and built by our own crews.

Agile Courts has built sports surfaces across the Caribbean since 1972. Agile Turf is the synthetic line: court surfaces, golf surfaces and landscape, installed by our own crews over the base each site calls for and maintained under Agile Care. Every surface below is held to the same standard — and we live where we build, so service is measured in hours.

Agile Turf

TENNIS COURTS

15 mm

The original. Dense, close pile; takes line marking cleanly.

Leisure Padel

PADEL COURTS

12 mm

Sand-dressed; true bounce and a predictable read off the glass.

Sports Delux

FOOTBALL AND PLAY

33 mm

Cushioned, low maintenance, lines tufted in.

Agile Putt

PUTTING GREENS

12 mm

A true, consistent roll without daily greenkeeping.

Agile Chip

CHIPPING AND SURROUNDS

30 mm

The fringe to the green; non-infill.

Caribbean Estate

LAWNS AND POOLSIDE

45 mm

Four-tone pile; reads as a maintained lawn.

Samples of every surface are sent on request.

Agile Courts

EST. 1972 · THE CARIBBEAN

Agile Turf

The tennis court surface, specified for private residences and resorts.

Agile Courts has specialised in tennis turf since 1972. Agile Turf is that surface — the name was first given to the tennis turf, and it remains the best we have found for the sport. A 15 mm curled-fibre pile, installed by our own crews over the base the site calls for.

The pile is specified at 8,500 dtex and 58,800 stitches per square metre on a 3/16 inch gauge — a dense, close surface that takes line marking cleanly and plays true across the whole court.

Court and line colours are specified at order. Samples and specifications are available on enquiry; we design, build and supply privately and to the trade. Stock is warehoused in Miami for the United States and the Caribbean.

Specification

Product	Agile Turf
Application	Tennis and multi-sport courts
Pile height	15 mm
Yarn	PE, 8,500 dtex
Gauge	3/16 inch
Stitch rate	280 per linear metre
Density	58,800 per m²
Colours	Blue, green and white as sampled
Fibre	Curled, non-directional

Specifications as sampled. Samples available on enquiry.
USTA certification in process.

15 MM CURLED-FIBRE PILE — COLOURS AS SAMPLED

OLIVE GREEN · FOREST GREEN · BLUE · TERRACOTTA

A SELECTION FROM THE FULL RANGE — COURT AND LINE COLOURS SPECIFIED AT ORDER

Agile Courts

EST. 1972 · THE CARIBBEAN

Agile Turf — Leisure Padel

The padel court surface, specified for private residences and resorts.

Leisure Padel is the padel court surface: a 12 mm pile at 58,800 tufts per square metre, in pink, with the court lines tufted in rather than painted on.

A short, dense pile, dressed with sand to the playing specification. It gives the ball a consistent bounce off the surface and a predictable read off the glass, and it holds its colour in Caribbean sun and salt air.

Courts are built by our own crews over the base the site calls for, and maintained under Agile Care — re-sanding, glass and hardware checks, net replacement.

Samples and specifications are available on enquiry; we design, build and supply privately and to the trade. Stock is warehoused in Miami for the United States and the Caribbea

Specification

Product	Agile Turf — Leisure Padel
Application	Padel courts
Pile height	12 mm
Yarn	PE, 9,000 dtex
Gauge	3/16 inch
Stitch rate	280 per linear metre
Density	58,800 tufts per m²
Colour	Green and blue held in stock; full range to order
Backing	Two-layer PP cloth + PU

Specifications as sampled. Samples available on enquiry.

12 MM PADEL PILE — AS SAMPLED

GREEN · BLUE · LIGHT BLUE · TERRACOTTA · PINK

A SELECTION FROM THE FULL RANGE — GREEN AND BLUE HELD IN STOCK, OTHERS TO ORDER

Agile Turf — Sports Delux

The all-purpose sports surface, specified for private residences and resorts.

A 33 mm pile of S-shaped monofilament over a curled KDK thatch, for football, play lawns and the mixed use a property actually puts a field to.

It is cushioned: the curled lower fibre gives underfoot and softens a fall. It asks almost nothing of the grounds team — no mowing, no irrigation, no seasonal recovery — and the lines are tufted in rather than painted on.

It is not specified for professional competition; where a sanctioned surface is required we would specify otherwise. For everything short of that, it is our recommendation.

Samples and specifications are available on enquiry; we design, build and supply privately and to the trade. Stock is warehoused in Miami for the United States and the Caribbean.

Specification

Product	Agile Turf — Sports Delux
Application	Football, play lawns and multi-sport areas
Pile height	33 mm
Yarn	PE, 8,000 + 6,800 dtex
Fibre	S-shaped monofilament over curled KDK thatch
Gauge	3/8 inch
Stitch rate	250 per linear metre
Density	26,250 per m²
Colours	Emerald green and white

Specifications as sampled. Samples available on enquiry.

Agile Turf — Agile Putt

A permanent putting green, specified for private residences and resorts.

Agile Putt brings the putting green to the property — a permanent green for private residences, resorts and practice facilities, shaped to the site. It removes mowing, rolling, irrigation and seasonal recovery from the operating schedule entirely, and is ready to play every morning of the year.

The surface is the point. A 12 mm pile at 58,800 stitches per square metre delivers a true, consistent roll, ball after ball, and holds its pace in Caribbean conditions — sun, salt air and tropical rain — without the daily greenkeeping a natural green demands.

Breaks, tiers and fringe are designed with you at commissioning. Designs, samples and specifications are available on enquiry; we design, build and supply privately and to the trade. Stock is warehoused in Miami for the United States and the Caribbean.

Specification

Product	Agile Turf — Agile Putt
Application	Private putting greens, resorts and practice facilities
Pile height	12 mm
Yarn	9,000 dtex
Density	58,800 per m²
Design	Greens shaped to the site — breaks, tiers and fringe to order

Specifications as sampled. Samples available on enquiry.

Agile Turf — Agile Chip

The chipping surface and green surround, specified for private residences and resorts.

Agile Chip is the surround to the green. A 30 mm non-infill pile for chipping areas, fringes and approaches, shaped to the site so a lofted shot is played from the surface it belongs on.

The pile is a single tone — field green or light green, specified at order — in 12,000 dtex yarn at 23,100 stitches per square metre. Non-infill: nothing to top up, and nothing to migrate onto the putting surface. The 200 g PP and PU backing is specified for Caribbean conditions — sun, salt air and tropical rain.

Laid with Agile Putt, the two surfaces give a complete short game on the property. Samples and specifications are available on enquiry. Stock is warehoused in Miami for the United States and the Caribbean.

Specification

Product	Agile Turf — Agile Chip
Application	Chipping areas, green surrounds and fringe
Pile height	30 mm
Yarn	12,000 dtex
Gauge	3/8 inch
Stitch rate	220 per linear metre
Density	23,100 per m²
Colour	Field green or light green
Backing	200 g PP + PU
Construction	Non-infill

Specifications as sampled. Samples available on enquiry.

Agile Courts

EST. 1972 · THE CARIBBEAN

Agile Turf — Caribbean Estate

A permanent lawn surface, specified for private residences and resorts.

Caribbean Estate is a permanent landscape surface for every part of the property — from lawn areas to poolside. A 45 mm four-tone pile at 15,750 stitches per square metre presents as a maintained lawn at viewing distance and under daily foot traffic, and removes irrigation, mowing and seasonal recovery from the operating schedule entirely.

It carries the plush, luxurious feel our customers are looking for. The natural thatch, 45 mm pile height and sheer density give the surface both cushion and a true luxury feel underfoot — barefoot-comfortable at the pool edge, yet groomed rather than spongy. A very low infill requirement keeps that feel consistent across the whole lawn.

Samples on enquiry. Stock is warehoused in Miami for the United States and the Caribbean.

Specification

Product	Agile Turf — Caribbean Estate
Pile height	45 mm
Yarn	PE + PP, 15,000 dtex
Gauge	3/8 inch
Stitch rate	150 per metre — 15,750 per m²
Colouration	Four tones of green
Backing	Double PP + PU
Infill	Very low requirement

Specifications as sampled. Samples available on enquiry.

COLOUR	Range to order	Range; green and blue stocked	Emerald green and white	—	Field or light green	Four tones of green

— not stated on the sample. Figures are as sampled; samples of every surface are available on request.

Installation

Laid by our own crews over the base each site calls for — existing or new, including Agile Asphalt, our engineered base. Seams joined on seam tape with turf adhesive.

Installation supplies

Seam tape and turf adhesive are held in our Miami warehouse and sold alongside the line — for contractors, installers and estate teams laying turf themselves.

Agile Care

Annual maintenance by the team that built it: inspection, cleaning, re-sanding, hardware and a written court assessment.
